JavaScript · Python · C# · Java · SQL · HTML/CSS · MySQL · .NET · OOP · Data Structures

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Team Collaboration
- Adaptability
- Time Management
- Code Review

PROFILE

Third-year Software Engineering student at HiLCoE School of Computer Science and Technology with strong foundations in software development, backend systems, and UI/UX design. Experienced in building practical applications including management systems and e-commerce platforms. Passionate about cybersecurity and committed to contributing to safer digital environments. A proactive team player with excellent communication skills and a sharp problem-solving mindset.

EDUCATION

BSc in Software Engineering

HiLCoE School of Computer Science and Technology

Oct 2023 – Sep 2027 GPA: 3.0 / 4.0

PROJECTS

Bank Management System

C# · MySQL

Simulated core banking operations including account creation, deposits, withdrawals, and balance inquiries with a fully connected relational database.

- Designed a normalized MySQL schema to securely store customer and transaction data, ensuring data integrity.
- Applied OOP principles (encapsulation, inheritance) for a modular and maintainable codebase.
- Established a robust C# ↔ MySQL connection via MySQL Connector/NET for reliable data persistence.

C# · .NET Framework · MySQL · OOP

E-Commerce Website

HTML · JS · CSS

Full-featured buying and selling platform with distinct user roles, authentication flows, and admin control panels for product and order management.

- Implemented separate sign-up/login flows for customers and administrators with backend verification.
- Built admin panel for managing products, orders, and user accounts.
- Enabled seamless browsing, purchasing, and profile management for end users.

HTML5 · CSS3 · JavaScript

Snake Game

Java · JDBC · MySQL

Interactive Snake game with a graphical UI built using Java Swing/AWT, featuring core game logic, user input handling, and a persistent multiplayer leaderboard. (Apr 2024 – Jun 2024)

- Integrated MySQL database connectivity via JDBC to persistently track and display high scores for multiple players.
- Created a leaderboard feature that retrieves and ranks top scores from the database, adding a competitive element.

Java · Java Swing/AWT · JDBC · MySQL

Portfolio Website

HTML · CSS · JS

Personal portfolio website showcasing projects, skills, and experience as a developer — built with modern
